Professional Summary

AI/ML Engineer with expertise in designing, developing, and deploying **cloud-based machine learning pipelines** and **deep learning models** for production at scale. Skilled in **Transformer architectures (BERT, GPT, LLaMA, Mistral)**, **LangChain**, **Hugging Face Transformers**, and **MLOps** workflows. Proficient in **Python, PyTorch, and scikit-learn**, with hands-on experience in **data engineering, big data technologies, NLP, multimodal AI, reinforcement learning**, and **containerized deployments (Docker, Kubernetes)**. Adept at collaborating in agile, cross-functional teams to deliver **scalable, high-performance AI solutions** that align with business goals and enhance operational efficiency.

Core Competencies

- **AI & Machine Learning**: Deep Learning, NLP, LLMs, Transformer Architectures, Reinforcement Learning, Multi-Agent Systems, Model Evaluation, Optimization Techniques
- **ML Pipelines & Deployment:** End-to-End ML Pipelines, MLOps, Automated Testing, CI/CD, Model Deployment, A/B Testing, Azure DevOps
- **Data Engineering & Big Data**: Data Architecture, Data Processing Frameworks, FAISS, Pandas, NumPy, SQL Optimization
- **Tools & Frameworks:** LangChain, Hugging Face Transformers, PyTorch, TensorFlow, scikit-learn, Keras
- **Cloud & DevOps**: Azure (Blob Storage, Container Apps), AWS (S3, EC2), Docker, Kubernetes, Airflow (exposure)

Work Experience

Software Engineer – AI/ML & Cloud

*Navikenz (*October 2025 – Present)

(Previously Software Engineer Intern: March 2025 – September 2025)

- Designed and deployed **scalable ML pipelines** on Azure integrating preprocessing, model training, and automated deployment for real-time analytics.
- Developed **Transformer-based NLP models** (BERT, LLaMA) improving domain-specific accuracy by **18%**.
- Built **RAG pipelines** using LangChain and Hugging Face embeddings for high-accuracy document retrieval and QA systems.
- Implemented **MLOps workflows** with Docker, Azure DevOps, and CI/CD pipelines, cutting deployment time by **40%**.
- Conducted **A/B testing and performance evaluation** for production models to ensure reliability and scalability.

Data Science Intern

Futurense Technologies Pvt. Ltd (June 2024 – July 2024)

- Optimized SQL queries and database performance for an NLP document processing system
- Implemented error handling and logging mechanisms to improve system reliability
- Conducted root cause analysis for model failures and data processing issues

Full Stack Development Intern

Capabl (July 2023 – August 2023)

- Designed and debugged database schemas for a bookstore management system
- Resolved frontend-backend integration issues in a React/Node.js application

Key Projects

MindDocs AI – Document Intelligence Platform (Navikenz)

- Built a **multi-modal AI system** supporting document summarization, translation, and domain-specific RAG chatbots.
- Integrated **Azure Blob Storage** with LangChain and Hugging Face for processing **large-scale documents**.
- Deployed **containerized AI services** using Docker and Azure Container Apps with automated CI/CD.

AI-based Chatbot for Resident's Manual of AIIMS

- Developed a custom LLM chatbot achieving 92% accuracy in domain-specific healthcare queries.
- Implemented FAISS-based vector stores for fast document retrieval in RAG pipelines.

Legal Sage – AI-Based Legal Document Summarization

- Fine-tuned BERT, GPT-2, and T5 models for summarization and multi-language translation.
- Enabled structured data extraction and translation workflows for legal professionals.

Education

Jain University - BTech in Computer Science Engineering (AI & ML)
Expected Graduation: June 2025 | CGPA: **8.20/10** | Percentage: **82.90%**

Certifications

- Microsoft Azure AI-102 (AI Engineering)
- Microsoft Azure AI-900 (Fundamentals)
- Python Programming Certification
